

# BEAM

by EyeClick

## Network Requirements

### BEAM Network requirements:

- ▶ BEAM supports Windows 7 32/64bit.
- ▶ BEAM system requires a stable high speed LAN (cable) internet connection with the minimum bandwidth or download - 2mbps, and upload of 512kbps.
- ▶ In case there is no LAN connection available on-site, high speed internet bandwidth Wi-Fi router that meets the criteria above should cover the area.
- ▶ TCP Port 80 – this port must stay open and available as EyeClick will use this port mainly for TeamViewer remote connection in order to support remotely, and file transferring.
- ▶ BEAM requires one IP. The IP can be static or dynamic as long it meets the requirements above.
